

Environmental Policy.

Studio 10 is committed to developing new green initiatives into the daily operation of our business.

- We engage a waste management and paper recycling program which ensures less waste going to land fill.
- We use only environmentally friendly and accredited raw materials within our standard product range. Our management team ensures all paper and board products are chlorine free and produced by mills accredited with meeting International Standards of emission, pollution along with a commitment to continual improvement.
- Our print-house has achieved a Sustainable Green Print Level 2 Accreditation, a multi-level Environmental Management System from the Australian Printing Industries Association.
- All offset printing inks used are soy based and our equipment is maintained to ensure energy efficient printing which reduces the demand on natural resources.
